

friendlyway Video Wall[®]

The friendlyway Video Wall software is the application that lets you build, deploy, and manage the video wall. The software supports all picture formats, most video formats, texts, web pages, PDF documents, Flash animations, PowerPoint files, and TV broadcasts. With the friendlyway Video Wall software a professional digital signage presentation is quickly and easily composed, scheduled, and delivered for the dynamic playback. The software allows you to split your screen into multiple zones, each having different content, set transition effects for pages and individual objects, add music and much more.

friendlyway video wall software enables users to build, deploy and manage impressive video walls with a single multimedia source. The user-friendly interface allows creating professional video presentations and dynamic screen layouts rapidly by simple drag-and-drop from various media elements. The software supports all picture formats, most video formats, texts, web pages, PDF documents, Flash animations, PowerPoint files, and TV broadcasts.

The best price/performance ratio on the market:

Since there is no need to connect monitors to multiple sources, the price of the complete solution is significantly reduced.

The smallest effort and the shortest learning curve on the market:

Owing to the use of the most popular media formats and a very intuitive MS Office-like user interface, friendlyway Video Wall software requires less IT, programming, and designer efforts in comparison with competitors software packages.

The best playback quality for a wide set of popular files formats:

friendlyway Video Wall software is the only software package on the market that offers high quality of playback for many combinations of various file formats, whereas many competitors have to reduce the number and combinations of supported formats to reach an acceptable playback quality.

System requirements

Standard PC with Windows XP SP3 32/64 bit, Windows Vista SP2 32/64 bit, Windows 7 SP1 32/64 bit

1 GB RAM
